

## Intelligent monitoring for the healthcare and wellness markets

Smart Monitor™ is an innovative, San Jose, California company specializing in intelligent monitoring solutions for the healthcare and wellness markets. Our flagship product, the SmartWatch™, is a patented, intelligent motion detecting and alerting wristwatch. SmartWatch is a fully portable device that continuously monitors movements, analyses them for abnormalities, issues alerts and securely records unusual occurrences.

SmartWatch is available in the US in limited quantities. Call us at 1.408.754.1695 or visit us at [www.smart-monitor.com](http://www.smart-monitor.com) for more information.

### **Smart Monitor**

6203 San Ignacio Ave, Suite 112  
San Jose, CA 95119

### Peace-of-mind

- Receive text message or phone call alert so you can provide assistance in a timely manner
- Get loved one's location when there is an alerted incident

### Independence

- Alert family members automatically upon excessive or unusual movements
- Get help with the press of a button — at any time, in any situation
- Cancel any inadvertently triggered alerts

### Information

- Records and stores movement patterns for later review
- Creates detailed reports and graphs of movement patterns

### More than a Watch

The SmartWatch tells time but it also has built-in intelligence to monitor and analyze movements then send alerts wirelessly if excessive and repetitive motion is detected. It is non-invasive, passive and can be used by people of all ages. SmartWatch is fully portable and can be worn in and out of bed, as users go about their regular activities in homes, schools, offices and elsewhere.

SmartWatch users need an Android phone within a 3 to 5 foot radius. For a list of recommended Android phone for the SmartWatch please refer to our website at [www.smart-monitor.com](http://www.smart-monitor.com).

When the SmartWatch detects excessive and repetitive movement, it wirelessly signals the user's smart phone, which within seconds sends a text and phone call alert.

The family member's phone, which receives the alerts, can be any kind and anywhere.
