

NEVER MISS A BEAT: JUST 'CLIP AND GO' FOR STEREO MUSIC AND CRYSTAL CLEAR CALLS

New Jabra CLIPPER clips on to bag, clothes or belt and switches seamlessly between music and calls

Barcelona, Spain – February 2010: Enjoy your favourite tracks in stereo style, without missing a call, using the new Jabra CLIPPER Bluetooth® stereo headset. Developed by GN Netcom, a world leader in innovative headset solutions, the tiny clip-on device with noise-blocking stereo headphones lets you listen to your favourite tunes as well as take calls while on the go. With minimalistic controls and smooth Scandinavian styling, the Jabra CLIPPER mixes coolness with functionality to set you apart from the crowd.

Music lovers need no longer worry about the sound of their favourite tracks drowning out the ringing of their mobile phone. With the Jabra CLIPPER the days of changing between MP3 player and your phone when a call comes in are over as both devices connect wirelessly so you can flip between calls and fantastic sounding tunes instantly. Calls will automatically override the sound of any music and at the touch of one multi function button users can easily pause, skip tracks or alter the volume. Weighing just 20 grams, the Jabra CLIPPER neatly clips onto your clothing, for example, your jacket, sweater or bag-strap, to keep it out of the way, and you can keep your phone and MP3 player separately in a bag or pocket without breaking the connection; it will even give you a warning signal if you start to head out of range (within 10 m).

The Jabra CLIPPER is compatible with any device with Bluetooth wireless technology (2.1 incl. EDR, A2DP and AVRCP) including the Apple iPhone and iPod touch and has the ability to connect to two different devices at the same time thanks to Multiuse™ technology. You can even connect it to your PC to listen to music. The headset provides complete flexibility too when it comes to *how* you listen; noise-blocking in-ear buds are provided which eliminate external sounds keeping your music pure, however, the Jabra CLIPPER can also be used with any other 3.5mm headphones depending on your preference - the choice is yours.

Key Specifications of the Jabra CLIPPER:

- Bluetooth 2.1, including EDR, A2DP and AVRCP
- Clip-on wearing style
- Talk time = 6 hours
- Standby time = 8 days
- Dimensions = L47.95 mm x W16.45 mm x H25.50 mm

A BRAND BY
