

## EIZO Introduces Industry First Multi-Modality Color Monitor with FDA 510(k) Clearance for Mammography

Hakusan, Japan November 14, 2012 – Eizo Nanao Corporation (TSE: 6737) today announced it will introduce the 36.4-inch RadiForce RX840-MG, an industry first multi-modality color widescreen monitor which received FDA 510(k) clearance for mammography and general radiography from the U.S Food and Drug Administration, at RSNA 2012.

Due to the advancement of modality systems in the medical field, a huge variety and amount of medical images are being created. This has brought an accompanying need for medical imaging monitors that can handle multiple modalities and display many types and large quantities of medical images.

Within its 36.4-inch screen size, the RX840-MG is capable of displaying 8 megapixels (super-high-resolution of 4096 x 2160 pixels) of information volume without obtrusive bezels. Therefore, the RX840-MG is not only capable of displaying magnetic resonance imaging (MRI), computed tomography (CT), and ultrasound images, but also digital mammography images where high performance is required. Multi-modality color monitors that display multiple medical images all on one unobstructed screen simultaneously will streamline the radiology workflow and enhance efficiency.

EIZO will show this new model at RSNA 2012 (98th Scientific Assembly and Annual Meeting of the Radiological Society of North America) to be held from November 25<sup>th</sup> to 29<sup>th</sup> in Chicago, Illinois, USA at the McCormick Place. EIZO will be located in Hall A, Booth #3821.

### Availability

Mass production of the RX840-MG is scheduled for February of 2013. Availability varies by country so please contact the EIZO group company or distributor in your country for details.

### About EIZO

Founded in 1968, Eizo Nanao Corporation is a leading global manufacturer of high-end visual display products. The image quality, long-term reliability, and innovative features of EIZO monitors make them the products of choice in many financial trading rooms, back offices, hospitals, air traffic control centers, and design studios throughout the world. EIZO is based in Japan and listed on the first section of the Tokyo Stock Exchange. It is represented in over sixty countries by a network of subsidiaries and exclusive distributors.
