Mammo ViewBox Advanced Provides Radiologist with an Unparalleled Tool for Reading Digital Mammography in a Fully Integrated Workstation Environment.

November 25, 2012, Havertown, PA. Integrated Modular Systems, Inc. is showcasing Mammo ViewBox Advanced™ workstation with RIS, PACS and VNA services at RSNA 2012 for hospitals and health networks in Booth # 3701. Digital mammography has been shown to require up to twice the time to read a study. We partnered with Dr. Mark Jundanian, Saint Anthony Hospital, and Connect Imaging to bring to market the Connect Imaging Mammo ViewBox Advanced Workstation. This breakthrough workstation implements hanging protocols with staged views, providing unlimited layouts, and comparison presentations for the radiologist. It has been integrated with imsiVOICE-Interactive, our hosted RIS and digital voice system, to provide the radiologist with an unparalleled tool for reading digital mammography in a fully integrated workstation environment. This advanced workstation is also a multi-modality viewing station.

About Integrated Modular Systems Inc.

Integrated Modular Systems Inc. (IMSI) is a leading integrator of medical imaging and healthcare technology solutions. For over 30 years IMSI has been engineering, installing, customizing and supporting healthcare technology solutions to meet the individual needs of clients across the U.S. With expertise in web-based products, HL7 and DICOM standard conformance, IMSI offers a continuum of PACS and teleradiology products and services. IMSI works with corporate partners in the industry to design and bring to market the most technologically advanced solutions. IMSI concentrates on the needs of clients, so they can stay focused on their patients' diagnostic images. Find out more about IMSI on the internet at www.imsimed.com.

About Connect Imaging Inc.

Connect Imaging Inc., founded in 1999, specializes in providing customized modular PACS, RIS (Radiology Information Systems), and Voice Recognition solutions to meet the exact workflow needs of community hospitals, imaging centers, and specialty practices such as mammography, mobile imaging, and

perinatology. The company offers more than 15 different modules and utilities for PACS, RIS, and VR, allowing facilities to have a system designed that meets their exact needs and budgets, yet allows for growth. The company prides itself on having one of the best reputations in the industry for customer support. For more information, visit www.connectimaging.com.
